When you are newly diagnosed, you will find that you have many questions about this diagnosis and what it means for you, how it will impact your life and the lives of your loved ones. This support group for people diagnosed within the past 6 months will help you cope with the challenges of living with MS and give you the opportunity to meet others affected by MS.

Leading the group is Allison Fine, MSW, a counselor in private practice. Allison has worked as a therapist and group facilitator for over six years and has experience in both the health and mental health fields, working with many individuals living with MS.

This group provides a safe and comfortable environment, where participants can share their concerns and challenges about MS, and relate to others in a similar situation.
